

If your device already has a Dynamic DNS update client, Basic Integration is EASY!

Industry Standard Protocol

Raw HTTP GET Request

```
GET
/nic/update?hostname=yourhost.domain.com&myip=youripaddress
HTTP/1.0
Host: members.ddnsprovider.org
Authorization: Basic base-64-authorization
User-Agent: Company Model / Version
name@domain.com
```

Example update request string

```
http://username:password@members.ddnsprovider.org/nic/update?hostname=yourhost.domain.com&myip=youripaddress
```

Please Note: Any additional parameters (ie wildcard, mx, backmx, etc;) will be ignored by No-IP update servers.

Additional Information: NoIP.com/integrate

No-IP Protocol

Raw HTTP GET Request

```
GET
/nic/update?hostname=yourhost.domain.com&myip=youripaddress
HTTP/1.0
Host: dynupdate.no-ip.com
Authorization: Basic base-64-authorization
User-Agent: Company Model / Version
name@domain.com
```

Example update request string

```
http://username:password@dynupdate.no-ip.com/nic/update?hostname=yourhost.domain.com&myip=youripaddress
```
